DECORATING DEN INTERIORS®

*design tip of the month*

— APRIL 2020 —

With the cold temperatures subsiding and the sun shining more often, it's refreshing to know that spring has arrived. Is your home in need of a refresh? Here are a few soft and subtle accents that can help you decorate around the season.

- House plants and floral arrangements make it simple to say hello to spring and bring the outdoors in. Pick your favorite seasonal options and spread them around the house.
- An accent wall can bring life back to your home with ease, so consider painting with a pop of color or a fun floral wallpaper.
- Beyond the usual pastels that make spring pop, navy blue is a color that can emphasize those lighter shades during spring. Use this as an accent color or a main focal point in your home.
