# The Art of the Holiday Table

# A Spot at the Table

Woodsy and down-to-earth or sparkle and glamour can all create show stopping table decor

'Tis the Season to be Thankful

Any time of year is a great time to give thanks. Your guests will get the message with these thankful place settings.

Show off your beautiful china with simple place settings, such as single piece of greenery or elegant napkin holder. We love the sheet music as a place mat in the bottom right-hand image.

Simple Sophistication

Sometimes the china and elegant formal place setting is all your table needs.

# Center of Attention

Decorative styling is taken to another level with the addition of a grand scale centerpiece

This woody, down-to-earth centerpiece brings the height without the drama. Don't forget the small details that complete your table scape. For instance, these tree branch coasters help pull the entire look together.

Have fun with your centerpiece. Colorful ornaments intertwined with tree branches give this table scape a whimsical feel.

For a little more glamour, gold and silver are your go to. Metallic finishes create a winter wonderland on these two tables

# Mantel Statement

Fireplace mantels are the perfect setting for holiday displays

Mantels are a great place to display your holiday collectibles or carry your holiday décor theme. This display is shown on a buffet but could also be arranged on a mantel.

A collection of nutcrackers adds height and interest to the mantel and extra details to the hearth.

Red poinsettias create an eye-catching focal point above this fireplace. Coordinating flowing fabric and berry branches add texture.

Bring the outdoors in with garlands of greenery. A fun tip: if you need to secure your mantel displays, Command strips or poster putty help keep your items in place and when removed properly, shouldn't leave a mark.
